We specialize in Microsoft's power platforms...

...designing and developing a process to deliver a digital solutions

Making sure the solution fits our clients needs

- Understanding with intent, so we can deliver on the 'how' as well as the 'what'
- Pinpoint areas that hold ambiguity to agree an approach that works
- Establishing options with clearly defined challenges, benefits and drawbacks
- Setting up a prototype and walking through the design and allowing for a hands on time prior to and during detailed development
- Testing, refining and scaling the solutions so it works great first time!

Different engagement models we offer

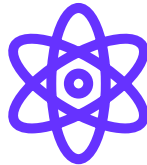

Business transformation

Business transformation is necessary for companies that want to stay competitive in today's fast-paced business environment, continuously evolving and adapting to meet the changing needs of their customers and the market.

Datanomy will work with business leadership to understand transformational aims and set out an approach to dissect the vision into key value chains. Working with the team to increase engagement and cultivate a culture of change to deliver business benefits.

Discovery days

Business' often face a specific challenge to address a process with limited timeframes, resources and identifiable steps to undertake. Overcoming these obstacles are often the key to facilitate an improvement in performance.

As a targeted transformation, Datanomy will work with your team to establish aims and define what success looks like. Through a workshop the business process is defined, and key challenges identified. Core data inputs and business rules are defined to set out a digital solution.

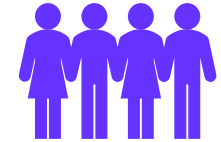

Defined Projects

Projects, the cornerstone of every successful business, range from discrete work to cross functional processes. Focus and execution of key aims define a projects perceived success.

Datanomy apply their business knowledge, leadership experience and technical expertise to develop, design and deliver digital solutions. With their unique skillset they are able to meet business requirements with a pro-active approach limiting the time-burden being placed on clients and their teams.

Team development

A business has three legs - people, systems and processes. Putting the right tools in place is a key step but can only be made effective through the people who run and use these tools.

As part of project delivery and beyond, Datanomy work with your team to support them through their digital learning journey. Supplementing existing free and paid courses on the MS power platform, we provide a hands on, practical experience working through problems and solutions in short effective work shops.

About the team

Datanomy was founded in 2022 by two accountants, who have 30 years experience between them running digital transformation projects in large complex organisations and have consistently been recognised for delivering results.

Having worked across a multiple different business sectors in both leadership capacities and more recently as consultants they have become highly skilled, understanding client needs, pin pointing ambiguity and the need to design appropriate business rules. This enables them to quickly translate requirements into actions that drive business performance, improve team engagement and deliver impactful products.

Since inception Datanomy as a business has onboarded clients across different industries and spanning multiple geographies and as a result has expanded it's team.

Their vision is to be recognised by the industry as a service provider that delivers bespoke digital solutions to the individual client needs. Through their unique ability to quickly understand the business and industry of their clients, they are able to identify a solution that supports both tactical and strategy objectives, delivering to high standards and apply exceptional customer experience.
