Test
Refine the solution, deconstruct issue, understand and manage exception

Showcase solution

**New products & services delivered**

- Understanding with intent, so we can deliver on the 'how' as well as the 'what'

- Pinpoint areas that hold ambiguity to agree an approach that works

- Establishing options with clearly defined challenges, benefits and drawbacks

- Setting up a prototype and walking through the design, allowing for a hands-on time prior to and during the detailed development

- Testing, refining and scaling the solution so it works great first time!

Our approach to team engagement, ensures our solutions are adopted, engaging and are more likely to deliver results

DATANOMY

Facilitate reporting through robotic transformation

Accessible data maintained in the cloud

Automatically Ingest and transform data from multiple different sources

Oracle

MS Dynamics

Integrate data no matter the sourced – established databases & ERPs to excel & CSV
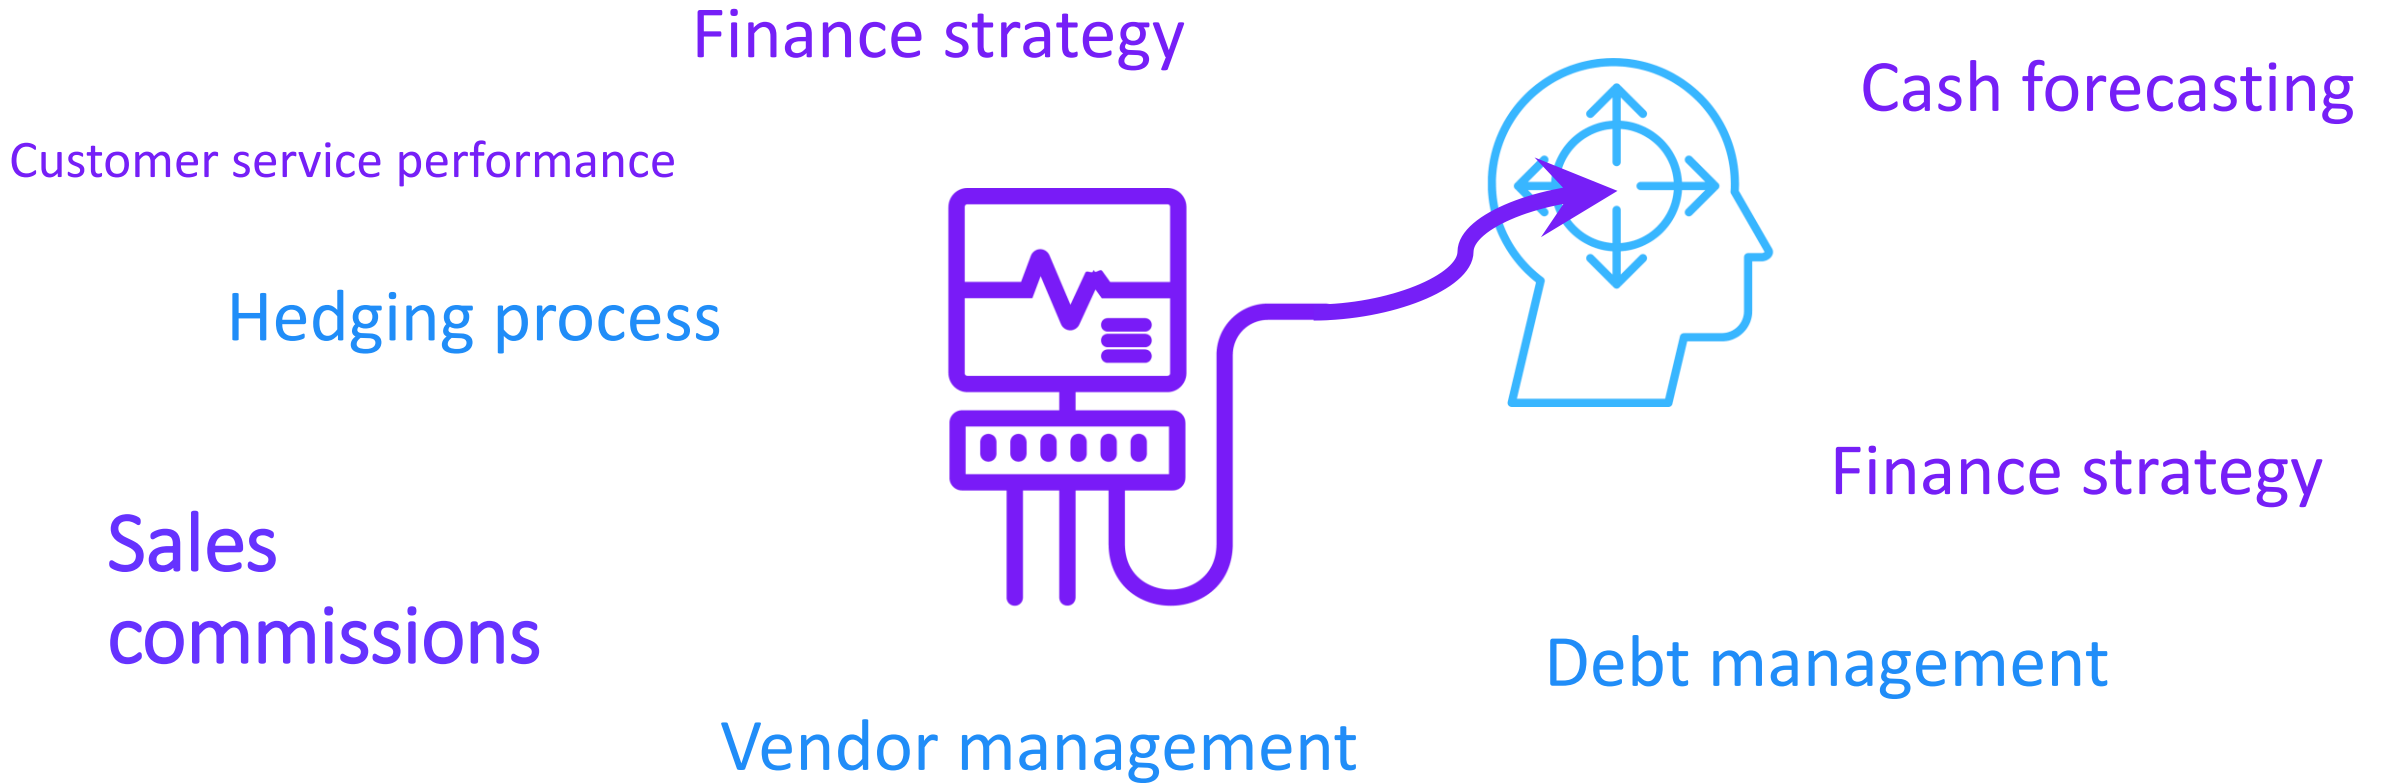

Excel

Salesforce

SharePoint

SAP

We provide expertise on using extract, transform and load (ETL) tools to deliver data in a format that makes first class insight easy to execute

DATANOMY

Accessible data, better governance and empowered teams

Digital, interactive reports – developed around your needs

Easy to set up report subscriptions and PDF outputs

DATANOMY

Developing your processes into a complete digital solution

Data Input	Data Validation	Approval workflow	Business Rules	Reporting & analytics	User Interface

| Power Automate-Desktop | SharePoint | Power Automate-Desktop | Power BI | Power BI | Power apps |

| Excel | Dataverse | Cloud flow | Cloud flow | Excel | |

We tailor stitch tools together to work in a practical, cost-effective way that work with your business requirements

DATANOMY

# We offer a range of alternative approaches to suit client needs

Business transformation

Business transformation is necessary for companies that want to stay competitive in today's fast-paced business environment, continuously evolving and adapting to meet the changing needs of their customers and the market.

Datanomy will work with business leadership to understand transformational aims and set out an approach to dissect the vision into key value chains. Working with the team to increase engagement and cultivate a culture of change to deliver business benefits.

Discovery days

Business' often face a specific challenge to address a process with limited timeframes, resources and identifiable steps to undertake. Overcoming these obstacles are often the key to facilitate an improvement in performance.

As a targeted transformation, Datanomy will work with your team to establish aims and define what success looks like. Through a workshop the business process is defined, and key challenges identified. Core data inputs and business rules are defined to set out a digital solution.
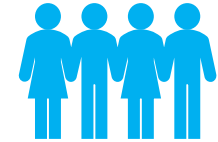

Defined Projects

Projects, the cornerstone of every successful business, range from discreate work to cross functional processes. Focus and execution of key aims define a projects perceived success.

Datanomy apply their business knowledge, leadership experience and technical expertise to develop, design and deliver digital solutions. With their unique skillset they are able to meet business requirements with a pro-active approach limiting the time-burden being placed on clients and their teams.

Team development

A business has three legs - people, systems and processes. Putting the right tools in place is a key step but can only be made effective through the people who run and use these tools.

As part of project delivery and beyond, Datanomy work with your team to support them through their digital learning journey. Supplementing existing free and paid courses on the MS power platform, we provide a hands on, practical experience working through problems and solutions in short effective work-shops.

DATANOMY

About the team

Datanomy was founded in 2022 by two Chartered Management Accountants, Krishna Sivasamy and Nishant Jain who have a passion for data and report optimisation and leveraging these tools to increase team engagement.

Datanomy believe that a company's greater asset is their people, and we seek to work with clients that share this belief. As a business Datanomy is focused on leveraging digital tools and systems to enhance and extend your team's capabilities with a focus on improving the performance of your business. With their management accounting background Krishna and Nishant have worked across multiple different business sectors both in leadership capacities and as consultants. Through this experience they have become highly skilled at understanding client needs, pin-pointing ambiguity and designing business rules and processes. This has enabled a finely tuned ability to translate requirements into actions that drive business performance, improve team engagement and deliver impactful products.

Since inception Datanomy has onboarded clients across different industries and multiple geographies and as a result have expanded their team of developers and project managers all of whom have been selected based on their high aptitude to developing digital solutions and their empathy when dealing with clients.
